

WOMEN IN TECHNOLOGY PROGRAM

Making Changes' Women in Technology Program (WIT) is a six-month integrated skills training program that effectively combines education, professional exposure, and experience by providing employability skills upgrading, technical training (Full Stack Web Development), and hands-on work experience to produce employment outcomes for unemployed or underemployed immigrant and Indigenous women in Calgary. The objective of this program is to increase women's participation in the technology sector by reducing barriers resulting in their economic independence.

Who Are We?

Making Changes Association is a dynamic non-profit, registered charity that empowers women, those who identify as women, and teen girls by providing them with the skills, confidence, and resources to support their pursuit of meaningful work and educational opportunities. Programs include Women in Technology, Employment & Life Skills, Dress for Success Calgary, and My Best Friend's Closet.

Looking to Get Involved?

We rely on the support of funders, donors, and volunteers to keep programs at no cost and accessible to all clients. If you know any individual who may benefit from this program or are an employer in the Calgary region looking to host practicum students, contact us today at: wit@makingchangesassociation.ca
